Dear Patient,

As part of our effort to provide you with the best possible care, we are working to provide all of our patients with information and access to promising clinical research opportunities.

To help us in this effort, we have partnered with **SiteRx**. SiteRx is on a mission to make clinical research accessible to as many people and communities as possible, as we all work together towards finding cures for difficult diseases. We believe in this mission and are excited to work with SiteRx.

How This Works

SiteRx works closely with doctor's offices across the United States to help them efficiently identify and evaluate possible treatment alternatives for their patients, including clinical research studies. As new studies become available, if your doctor thinks you may be a suitable candidate that would benefit from participating, they may discuss the opportunity with you, or instruct SiteRx to contact you to discuss the opportunity, share some information about the study, and ask you if you are interested.

It is important to mention that SiteRx does not conduct clinical research trials. They are a HIPAA business associate, acting as an extension of our medical practice and your doctor for limited purposes of helping us to consider treatment alternatives, including research opportunities, for each of our patients.

You are in Control

Participation in these clinical research opportunities is completely up to you. You can opt out or discontinue at any time. SiteRx will be available to answer any questions you have throughout the process.

Protecting Privacy

SiteRx is required to comply with HIPAA as our business associate. Your personal healthcare information will be kept secure and confidential, and SiteRx will never disclose your contact information or health records to any third party except with your explicit permission. Your information will be shared only if you choose to participate in a research study and sign a HIPAA Release of Information form.

If you decide to move forward, SiteRx would work on our behalf to connect you to a nearby clinical research site and keep us updated on your progress.

Questions?

If you have any questions about SiteRx, please visit siterx.com, call **(866) 862-7880**, or ask your doctor.

Thank you so much for trusting us with your care.
